Customer Review:

“I’ve been working on cars my whole life. I own Weld County Kustomz and Jim from Inspired Led lighting introduced me to the amazing Led Auto lifts lights. They are a life changer!! All their products are so awesome it’s amazing where you can put these small LEDs.” – Joe A

Instructions

- 1** Align and position the light strips. Use the magnets to magnetize to the lift for the desired placement.
- 2** Connect strips by plugging the 10" and 63" cable to the in-line switch into female end jacks.
- 3** Plug in the 3.8 AMP power supply into wall outlet, reposition lights as needed before removing adhesive backing from in-line switch and adhering in place.
- 4** Use zip ties to permanently affix cables to the desired location. (When using the wire clips be sure to use isopropyl alcohol to clean the surface before installing to their location.)
- 5** Clean the surface using isopropyl alcohol and allow to dry. Remove the tape and install the inline switch.

(2) Silicone Jacketed Mega Bright Pure White Flexible LED Strips

(1) 3.8A Power Supply

(1) Inline Switch w/ adhesive back
