

Light up your imagination with this DIY Cut & Connect Lighting Kit from Inspired LED! Featuring three meters of flexible LED strips, a power supply, solderless connectors, and accessories, you can transform even the most unassuming areas of your home or business into a stunning focal point. All kit components are modular and can be combined with other Inspired LED products for a complete DIY lighting system!

(Qty. 1) 118" Strip 12V LED Flex Tape
Normal, Super, or Ultra Bright
(various colors)

118" (L) x 3/8" (W) x 1/8" (H)
This unique, low-voltage flexible LED tape offers a superior quality of light with the ability to cut to nearly any custom length, featuring continuous 3M adhesive backing for easy installation.

(Qty. 1) Class 2 Plug-In Power Supply (various sizes)

SKU: 3752 (1A), 3542 (2A), 3753 (5A pictured)

Plug-in power supplies convert the standard 120V AC from US outlets to 12V DC, featuring a 6ft (1A/2A) or 8ft (5A) cable with 3.5mm end connector. **See table below for info on max loads.**

(Qty. 1) In-Line On/Off Switch
SKU: 4775

7.43" (L) x 0.75" (W) x 0.86" (H)
Switch connects to standard cables and power supplies using a 3.5mm input jack, allowing supply on/off control, VHB adhesive and cable clamps for mounting

(Qty. 2) 3ft Interconnect Cables
SKU: 4771

Interconnect cables provide simple connections from one system component to the next using 3.5mm plugs in a standard length of 36". **Other lengths available upon request.**

(Qty. 2) Solderless Tiger Paw Connectors (pairs)
SKU: 4938

1.51" (L) x 0.63" (W) 0.25" (H), 3.5mm connection
These handy accessories easily secure to the end of flexible LED strips, allowing for quick in field termination to standard interconnect cables.

(Qty. 6) Cable Clamps & Screws
SKU: 4774

1" x 1" plastic clamps help to support and conceal excess cable, can be secured via adhesive pads or 1/2" steel flathead Philips screws (included).

Additional accessories sold separately.

General Power Requirements:

Power Source	Maximum Length of LED Flex Strip Lighting			
	Normal Bright*	Super Bright**	Ultra Bright***	Mega Bright****
1 Amp (12 Watt)	154.5" (9.75 Watts)	75" (9.75 Watts)	42" (9.75 Watts)	39" (9.75 Watts)
20 Watt Dimmable Transformer	252" (15.75 Watts)	123" (15.9 Watts)	70" (15.9 Watts)	63" (15.9 Watts)
2 Amp (24 Watt)	312" (19.5 Watts)	150" (19.5 Watts)	85" (19.5 Watts)	78" (19.5 Watts)
40 Watt Dimmable Transformer	516" (32.25 Watts)	252" (32.25 Watts)	144" (33 Watts)	129" (32.25 Watts)
3.8 Amp (45.6 Watt)	582" (36.5 Watts)	282" (36.5 Watts)	159" (36.5 Watts)	146.5" (36.5 Watts)
5 Amp (60 Watt)	768" (48 Watts)	372" (48 Watts)	210" (48 Watts)	192" (48 Watts)
60 Watt Dimmable Transformer	768" (48 Watts)	372" (48 Watts)	210" (48 Watts)	192" (48 Watts)
100 Watt Dimmable Transformer	1284" (80.25 Watts)	624" (80.6 Watts)	350" (80 Watts)	320" (80 Watts)
150 Watt Dimmable Transformer	1920" (120 Watts)	924" (119.35 Watts)	522" (120 Watts)	480" (120 Watts)
200 Watt Dimmable Transformer	2568" (160 Watts)	1236" (160 Watts)	696" (160 Watts)	636" (160 Watts)
300 Watt Dimmable Transformer	3840" (240 Watts)	1860" (240.5 Watts)	1044" (240 Watts)	960" (240 Watts)

*Normal Bright noticeable voltage drop after 200"
**Super Bright noticeable voltage drop after 150"
***Ultra Bright noticeable voltage drop after 105"
****Mega Bright noticeable voltage drop after 100"

Strips exceeding the above measurements should be powered from the center using a Screw Terminal Mid-Connector Tiger Paw (SKU 3548) to avoid a noticeable voltage drop.

Please Note: Power requirements will vary slightly based upon system configuration, these are conservative values meant for general calculations only, contact us directly for more information on powering large or complex systems.

3M Kit SKUs:						
	Warm 3000K	Pure 4200K	Cool 6000K	Red	Green	Blue
Normal Bright	3462	3626	3463	3464	3465	3466
Super Bright	3472	3624	3473	3474	3475	3476
Ultra Bright	3480	3622	3481	--	--	3482

Instructions: To install, you will need all Cut & Connect Kit components, masking tape, a pair of scissors, and a Phillips head screw driver (if desired)

- 1** Measure desired length of LED strip and cut along copper solder pads ONLY (located every 3 or 6 LEDs)

- 2** Separate Tiger Paw pair by pressing firmly along edges of board, bending until individual connectors snap apart

- 3** Make note of assigned polarities by locating the (+) symbols on connectors

- 4** Take hold of black sliding latch and pull outward to open connector

- 5** Peel adhesive about 1" back from end of LED strip, and align (+) polarity of strip to (+) polarity of Tiger Paw

- 6** Insert LED strip into gap above sliding black latch, ensure that strip is centered and fully inserted before sliding latch firmly closed

- 7** Reinforce connection by pressing and sticking the adhesive of the flexible strip to the Tiger Paw board

- 8** Repeat steps 3-7 to terminate opposite end of flex strip, then repeat for other pieces of flex as needed

- 9** Temporarily mount terminated LED flex in desired locations using masking or painters tape

- 10** Connect LED flex strips end to end by plugging interconnect cable into each Tiger Paw

- 11** Connect cable from first string of lights to input of switch

- 12** Connect cable from plug-in power supply to other input of switch

- 13** Plug power supply into wall outlet and turn on switch to test connections

- 14** Once satisfied with placement of LEDs, remove adhesive backing from components, and mount in place

- 15** Mount cable clamps by removing adhesive backing or by screwing into desired locations to hold back excess cable

- 16** Once finished, give yourself a pat on the back, sit back and enjoy your new lighting system!
