

FlexFit Series End Caps

for Slat Wall Applications

Inspired LED

SKU: 8619-END-1pc

Product Features:

- Material: ABS Polylac 765
- Finish: Black, smooth finish

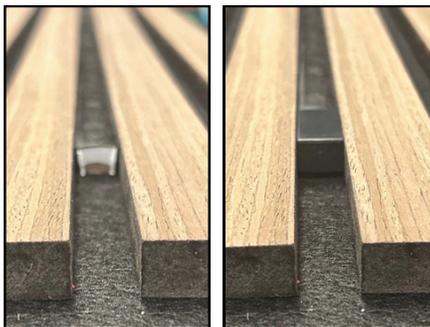

Specifications:

- Width: 0.55"
- Height: 0.39"
- Length: 1.18"

- Bundle Packs Available:
 - 10-Pack
 - 20-Pack

Compatible Accessories: *(sold separately)*

- **Black Silicone Cover:** Available in 100M or custom lengths, sold by the foot (SKU 8518)
- **Mid Caps:** Caps to cover connectors and cable, allowing for mid-way terminations (SKU 8619-MID)
- **Flexible LED Strips:** All Inspired LED flexible LED strips are compatible, *with the exception of the Double Row Ultra Bright and Outdoor options.*
 - **Note:** Color-changing or color-shifting connectors are not compatible due to size constraints; direct-soldered cable leads will be necessary for these systems.
- **Connectors:**
 - (SKUs 8579-END, 8579-MID) Single-Color 8mm Clear 4-Screw Connector
 - (SKUs 8591-END, 8591-MID) Single-Color 10mm Clear 4-Screw Connector

Purpose:

These end caps are engineered for slat wall LED strip applications to provide a clean, finished termination at each end of the strip. The design fully conceals solderless connectors and cable leads while extending over the silicone lens to eliminate visible seams and prevent unwanted light leakage. Installing an end cap on both ends of each LED strip ensures a consistent, polished appearance and a seamless visual transition within the slat wall system.

No End Cap → Finished with End Cap

Install LED Strips → Cut Silicone to Length → Finish with End Caps
