24V 4 Amp DC Plug-in Power Supply

Inspired LED's **24V 4 Amp Plug-in Power Supply** is a simple, hassle-free way to power 24V DC LEDs. Featuring our standard 3.5mm x 1.3mm output, and a detachable power cable, this product combines easily with other 24V Inspired LED products to create the perfect plug-and-play lighting system for your home or business!

Product Features:

- Manufactured by KSPower (Model: ZF120A-2404000)
- Convenient plug & play install
- Central transformer
- Detachable outlet plug cable
- Level VI Compliant
- UL listed: E584317
- For indoor use

Specifications:

- 2.36" (W) x 1.47" (H) x 6.02" (L)
- 48" attached cable with 3.5mm x 1.3mm connector
- 48" detachable cable with grounded three prong outlet plug
- Input: 100 - 240V AC, ~2 AMP, 50/60Hz
- Output: 24V DC, 4 AMP
- (+) polarity indicated by red wire

SKU #8584

Instructions:

1. Install 24V LED lights and other system components according to their instructions
2. Connect detachable cable with standard outlet plug into the corresponding jack on the side of power supply
3. Connect 3.5 x 1.3mm plug into first run of 24V LED lights
4. Plug power supply into standard wall outlet and test system functionality

Power Requirements:

	24V LED Flex	240 Ω LED	COB LED	100 Ω LED
Max Length on 4 Amp (96 Watt)		432"	329"	188"
Max Length before Voltage Drop		244"	204"	151.5"

***Please Note: LED strips can be powered from center to prevent voltage drop. Power requirements will vary slightly based upon system configuration, contact us directly for more information on powering large or complex systems.**
