

inspired LED Sewing Machine LED Expansion Kit

The Inspired LED Sewing Machine Kit offers ample lighting for your sewing machine needs, and after installation you will likely have a strip of perfectly good flex left over. The Inspired LED Sewing Machine Expansion Kit comes with everything you need to take that old flex and use it to light a second sewing machine!

Instructions: Watch our full installation video at: <https://www.youtube.com/watch?v=qnCwclgBi7g>

- 1 Position sewing machine so that cables will run along back side
- 2 Hold leftover LED strip in desired location with connector near base, measuring necessary length
- 3 Cut LED strip to length on copper pad "cut points" located every 3 LEDs, keeping side with connector
- 4 Peel adhesive backing off of LED strip and stick LEDs under the neck of sewing machine
- 5 Plug 1' cable into LED strip connector and run cable along the back of sewing machine
- 6 Peel adhesive backing off switch and stick to desired location on sewing machine
- 7 Plug cable from LED strip into the input port on the SIDE of switch
- 8 Plug cable from power supply into the other input port on the SIDE of switch
- 9 Plug power supply into wall outlet and turn on switch to test LEDs
- 10 Peel adhesive from black clips, use to hold back excess cable, and enjoy!
